- rocailles 15/0 col.B
- bicono 4 mm

Hint: work the first few turns tightening the processing; start tightening your work from the 5th lap onwards!

From the second reason on, arrived at lap **9**, create an arc of only 2 roc 15/0 col. B over a group of 11/0 delica, because we will use the roc 15/0 col. B of the first module as a union of the two modules!

Then join the various modules to do them this way:

Create a number of modules suitable for the circumference of your arm; join them all in the way indicated above and make a closure at will on the two sides left free!
I made a total of 5 modules for a bracelet with a diameter of about 17 cm.

Good Job
